

# MoneyVac

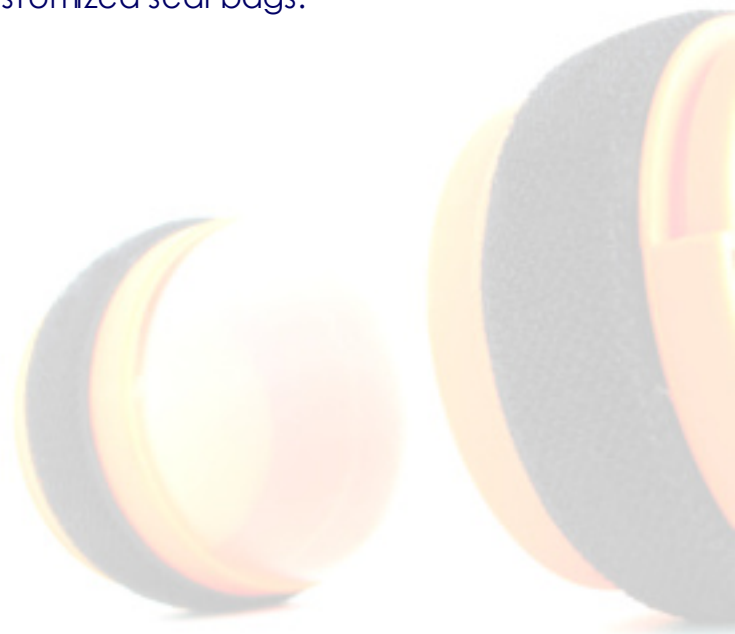

The TELETUBE **MoneyVac** system is a compact pneumatic conveyor that is mainly used for cash evacuation.

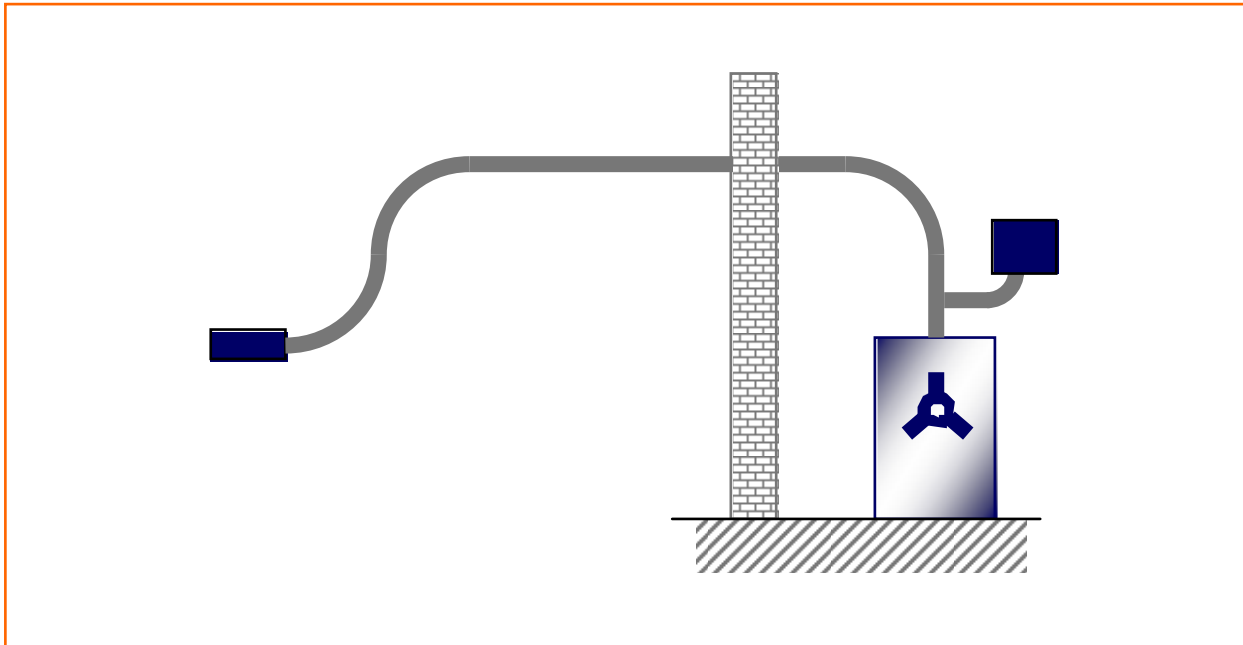

It is a one-way system to send from the departure station to the arrival unit. This unit can be integrated in the safe or into the cash transportation bag.

**MoneyVac** systems can be built in different tube sizes. They use small sized capsules, regular carriers or single use seal bags.

Various options are available, including color coded capsules or carriers, and customized seal bags.

## MoneyVac

- Simple and efficient
- Compact and low cost
- Full automatic with adjustable time-out timer
- Easy to install and integrate
- Flexible or rigid-tube system
