Your complementary means of communication

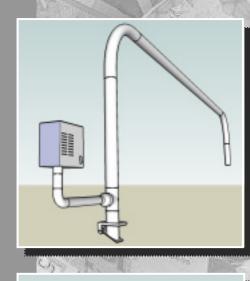

MoneyVac is a one-way, single station cash-evacuation system from 1 point to the secure area or straight into the safe. Use of single-use sealbags is possible.

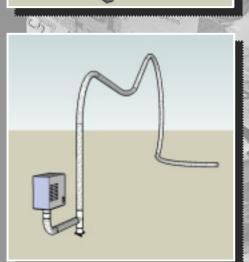

MoneyVac is also available as a DIY kit, containing everything that is needed to install a fully working system (blower, departure station, arrival station, flexible tubing, carriers, accessories...). The kits are available per unit, per six-pack or per eight-pack for professional resellers. Contact us for more information.

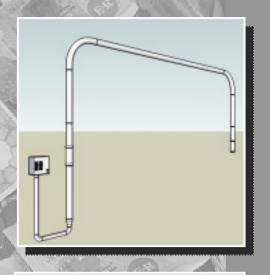

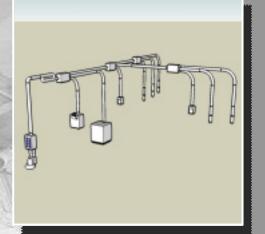

MultiSafe is a one-way, multi-station system to evacuate cash from multiple points to the secure area or straight into the safe. Use of single-use sealbags is possible. The PC-based version has remote supervision, statistics and maintenance over the Internet (ideal for retail

CASH EXCHANGE with our TWO-WAY SYSTEMS

Papyrus is a two-way system to exchange cash or valuables between two stations, for example one checkout and the main office.

MultiNavette is a bi-directional system to evacuate and exchange cash or valuables between the check-outs and the main office or safe. Available with or without intermediate safe storage. The PC-based version has remote supervision, statistics and maintenance over the Internet (ideal for retail chains).

Besides standard solutions, as a developer-manufacturer, C.P.Bourg can adapt, customize and develop devices or systems that are fully suited to your needs:

- user and carrier identification
- additional functionalities
- integration into specific/existing furniture
- hardware & software integration
- database sharing
- remote warning signals
- ...
